

## INSURANCE CONSULTANCY SERVICES

### 1. Scope

INDEVCO's Insurance Consultants advise and assist clients in protecting against all risks that can be insured. Insurance consultancy assists in identifying risks, administering insurance services, and conducting audits for the safety and security of clients' commercial assets, employees, and related entities.

### 2. Objectives

INDEVCO's Insurance Consultants engage directly with clients to:

- Protect the client's property against all risks and business interruption; consultants recommend the system to conduct risk surveys, implement recommended safety procedures; secure, renew or amend needed policies; process claims; and train employees
- Recommend insurance coverage and follow-up requirements when the client intends to erect, construct or renovate facilities or to install or upgrade machinery; consultants review coverage insurance options, suggest procedures for monitoring projects and amending CAR / EAR policies, and recommend approach for processing claims
- Recommend insurance coverage and follow-up requirements to protect the client's employees and related third parties; consultants recommend the system for securing, renewing, processing all aspects of the client's medical, life, personal accident, workmen compensation, and travel insurance programs
- Recommend marine insurance coverage and follow-up requirements, when the client imports and exports; consultants recommend the system for securing, renewing, processing all aspects to ensure that shipments are covered to protect company assets
- Recommend other insurance coverage and follow-up requirements related to the client's public, product, motor, fidelity, cash in transit, cash in safe, burglary, staff apartments, offices, equipment and other assets; consultants recommend the system for administering, amending, and renewing policies, procedures and claims

### **3. Global Network**

INDEVCO provides specialized Technical & Consultancy Services through a global network of employees, consultants, and technical advisors located in Lebanon, Europe and the United States and in coordination with research and development centers and laboratories around the globe.

Technical & Consultancy Services are focused on industrial manufacturing, including but not limited to the production and trade of forestry and paper products, tissue, plastics, corrugated packaging, aluminum, consumer and away-from-home disposables, and other related products for B2B and FMCG sectors.
