

LOGISTICS CONSULTANCY SERVICES

1. Scope

INDEVCO's Logistics Consultants advise and assist clients on expedient and cost-effective clearing and forwarding using up-to-date technologies, a global network, and methodologies to add value and cost benefit. Logistics consultants recommend optimization to better plan, manage, and control flow of goods and services from point of origin to point of destination involving storage, warehousing, transportation modes, tracking and delivery of goods.

2. Objectives

INDEVCO's Logistics Consultants engage directly with clients to:

- Recommend the best synchronization of the client's business goals with its logistics system
- Advise in the development of policies and procedures for successful implementation of the client's logistics system
- Recommend and assist in negotiating prices, validity, and credit facilities with third-party service providers; support in coordinating with carriers, forwarders, clearing agencies, warehouses, and transport carriers for safe and timely dispatch of client's goods or arrival of incoming goods
- Advise on issuing the booking upon receipt of shipping request for import and export
- Advise on and recommend selection of clearing agents, coordination to withdraw containers, review and validation of documentation, legalization and certification of shipping documents, invoicing, and payment of invoices
- Advise and assist in development of reporting systems and statistical analysis using the latest technologies and tools

3. Global Network

INDEVCO provides specialized Technical & Consultancy Services through a global network of employees, consultants, and technical advisors located in Lebanon, Europe and the United States and in coordination with research and development centers and laboratories around the globe.

Technical & Consultancy Services are focused on industrial manufacturing, including but not limited to the production and trade of forestry and paper products, tissue, plastics, corrugated packaging, aluminum, consumer and away-from-home disposables, and other related products for B2B and FMCG sectors.
